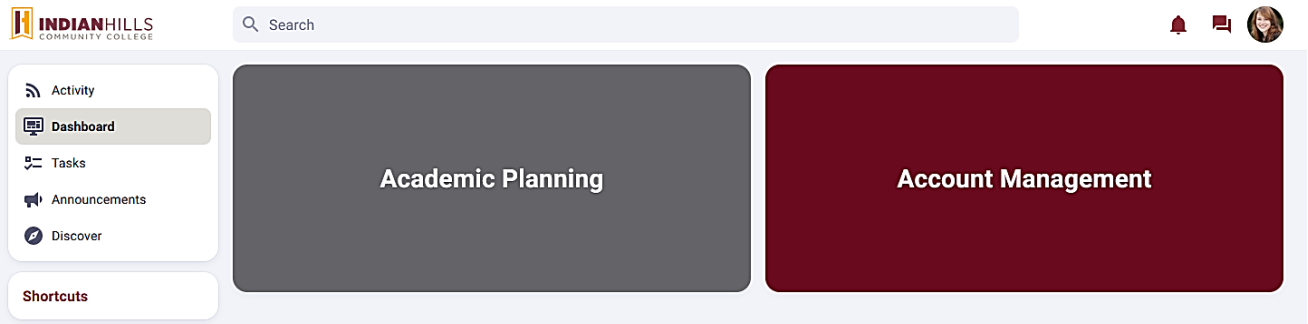
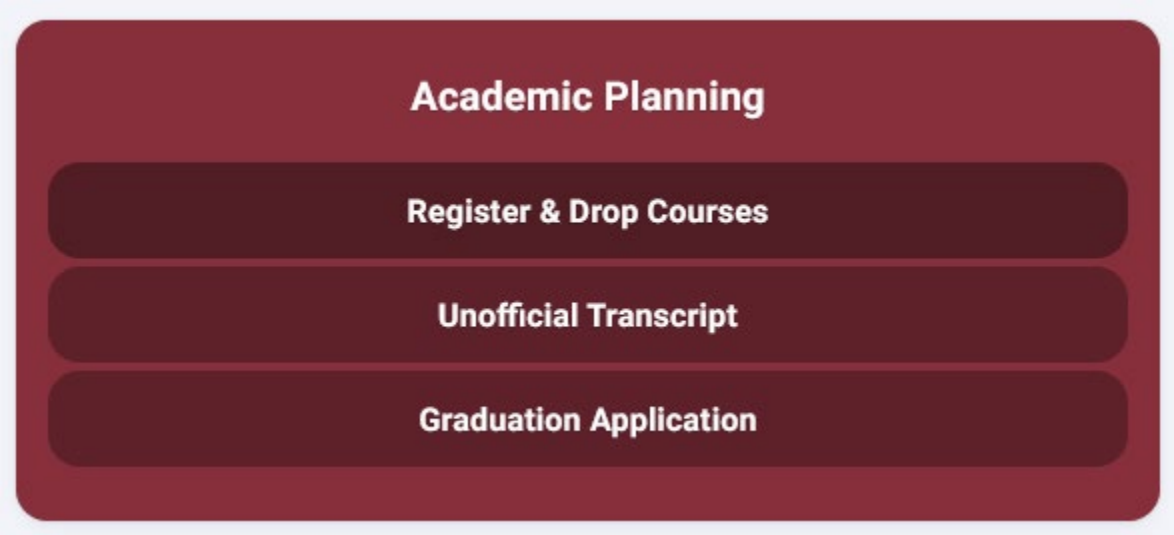
View Grades

You've worked hard completing your assignments, and now you want to know your course grades. You can find your midterm and final course grades for all your courses in WIN (Warrior Information Network). Here's how it's done.



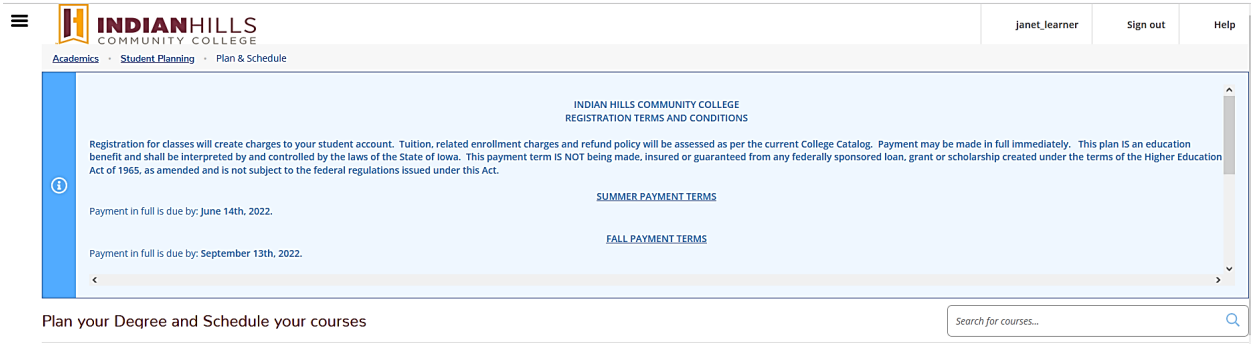
Once you have successfully logged into WIN (Warrior Information Network), hover over the Academic Planning Menu.



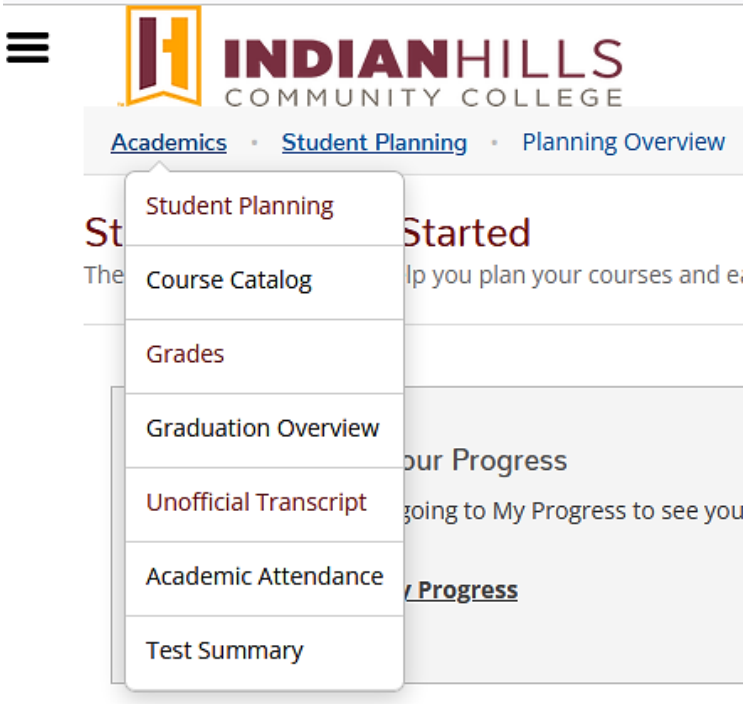
There are several links to choose from, including:

- **Register & Drop Courses** – Choose this link to access Student Planning, where you can register & drop courses, view your degree plan & current class schedule.
- **Unofficial Transcript** – Choose this option to view your unofficial transcript within Student Planning. Please note, if you have a current bill with the college, you will not be able to access this feature.
- **Graduation Application** – If you plan to graduate after the current term, please complete this application.

Under Register & Drop Courses, the Student Plan & Schedule will open.



To find Grades, hover over the Academics link located in the upper left-hand corner and click Grades.



The grades page will open. The courses in which you were enrolled for the selected term will be listed on this page. The “Course Section,” “Title,” and the number of “Credits” for each course will also appear. If midterm grades have been submitted for the course, they will appear in the grade one (Grd 1) column. If final grades have been submitted, they will appear in the final grade (Final Grd) column. Click “OK” to return to the “Current Students” menu.

And there you have it! You now know how to check your midterm and final course grades. For technical help, contact the IT Help Desk.
