Computer Software	Stephen Repp	<a href="mailto:StephenRepp_stephen_repp@stu.indianhills.edu">StephenRepp_stephen_repp@stu.indianhills.edu</a>

## **How does NetTutor work?**

ALL students will use the access code: **345-914-9122**. Fill out the registration page fields, press register and a password will be emailed to the email address you provide. When you connect with a live tutor, you will hear the cowbell ring, letting you know the tutor is now connected with you. The tutor can see what you type on the whiteboard and will help you work the problem out, giving you hints any time you get stuck. Remember, we are here to help, but not to do your work for you. Please come prepared to learn!

## **How do I get a tutor?**

It's easy to ask a tutor a question. Just click on the "Join Live Tutorial" option from the main menu and a tutor will be waiting to help.

## **Can I work offline?**

If you don't have time to connect with a live tutor, visit the Q&A Center. Simply ask a tutor a question using the whiteboard interface and receive feedback within 24 hours.

## **Can I review my previous sessions?**

You can review all of your previous tutoring session in the Archives. Tutoring session archives can be viewed, printed, and played back. This is especially helpful when you are studying for quizzes or exams.

## **What can I get help with?**

Tutoring is offered in the following disciplines: mathematics, sciences, English, reading & writing, languages, accounting, economics, finance and business, nursing, information technology and computer science.

## **What's the minimum time to work with a tutor?**

There is no minimum or maximum time to work with a tutor. Time is only deducted when a tutor is actively working with you, providing feedback on your Q&A question, or reviewing your paper.
